**Frame Model #808B**

**Frame Model #808R**

**Frame Model #808S**

**Frame Model #300**

## Purchasing Laser Glasses from Phillips Safety Products:

Phillips Safety uses a specific part number system to make ordering glasses easy for you, and to ensure that no mistakes happen on your order. All laser safety glasses' part numbers consist of two sections that are separated by a hyphen (-). The first half is the filter part number and the second half is the frame part number. To determine the part number of the glasses you want, simply decide which filter number you need and which frame number you want and put the two together. For example, if you want LS-KG5 filters in our frame number 33, your part number would be LS-KG5-33. In order to ensure that your order gets filled correctly, we ask that you follow this system when placing your orders.
